

Correction in Publication: *Anthurium nutibarense*

Thomas B. Croat, Missouri Botanical Garden

In a paper in *Aroideana* 28 entitled "New species of Araceae from Colombia" by Croat & Oberle, a mistake was made in failing to specify the holotype for *Anthurium nutibarense* Croat & Oberle. Though we listed three institutions we failed to declare which of the three institutions owned the holotype. This resulted in the publication of *Anthurium nutibarense* being invalid. In order to rectify this, the information is repeated below with proper indication of the holotype.

Anthurium nutibarense Croat & Oberle, *Aroideana* 28: 61. 2005 (July). Type: J.M. MacDougal, D. Restrepo & D. Sylva 3867 (holotype, MO-3670528; isotypes HUA, JAUM).
