What is an Aroid?

Aroid is the common name for members of the Araceae family of plants, sometimes known as the Philodendron or Arum family. The occasionally beautiful and often bizarre combination of spathe and spadix called the inflorescence, sometimes referred to as a "flower", is a distinguishing feature of all Aroids.

Anthuriums, Philodendrons, Calla Lilies, Flamingo Flowers, Jack in the Pulpit, Voodoo Lily, Lords and Ladies - all these are members of the family.

The mission of the International Aroid Society is to provide information, assist in the distribution of unusual species and provide fellowship and support to everyone with an appreciation for this wonderful plant family.
